**ProfiGymMat®**

180 x 60 cm,  
Density 110 Kg/m<sup>3</sup>  
Material: NBR

Like all of our ProfiGymMats, this gym mat consists of the soft and stable NBR foam. With a density of 110 Kg/m<sup>3</sup>, this ProfiGymMat is the softer version and is used particularly in the private sector. The food-safe material is characterized by its mechanical resistance and is therefore extremely durable. The mat is BPA-free and therefore suitable for pregnancy exercises and fitness with children.

**ProfiGymMat® Professional**

Length 120 / 140 / 180 / 190  
Density 170 Kg/m<sup>3</sup>  
Material: NBR

The ProfiGymMat® Professional is extremely robust with a material density of 170 kg/m<sup>3</sup>. Due to the new vertical structure, the mat wears less. This makes them even more comfortable and increases their durability at the same time. The mat is BPA-free and therefore suitable for pregnancy exer-

cises and fitness with children. The quality of the new generation of ProfiGymMat® Professional speaks for itself and meets the highest demands in all professional areas. The mats can be customized with UV printing upon request.

▶ MORE DETAILS 

**Trendy Ponte**

Size: 31 x 29 x 9,5 cm  
Material: EVA

Trendy Ponte offers you through its two sides a very extensive spectrum of possible uses. With the help of the pointed elevations and the depression in the middle, the board can be used particularly well for fascia training.

Above all, the supine position, in which pressure is created by lowering the pelvis, is particularly effective in mobilizing, stretching and strengthening the lower back.

Not only can the trigger points be determined individually, but a massage effect can also be created.

Incl. sales packaging.

Article 9117

The effects can also be felt during fascia training while standing, as the foot is mobilized and the balance is strengthened. In addition, the calf is stretched, the foot lift and balance are trained. The Trendy Ponte is not only suitable for fascia training, but also for the fitness area. It can be used as a rocker crosswise or lengthways to bring yourself off balance through conscious movements. A particular success is achieved in the areas of stabilization, balance and stretching.

**Trendy Marola**

30 x Ø 13 cm  
Material: EVA, ABS (tube and cap)

With the help of the stable and robust surface structure of the fascia massage roll, an excellent trigger point therapy can be brought about and a complete muscle massage can be achieved. This is particularly important because the everyday stress on our body can lead to one-sided stress on the muscle and fascia tissue.

As a result, the cells store more fibers, which causes the tissue to become denser and the circulation to be restricted, so that shortened and densified muscle areas are formed, so-called trigger points.

Article 9102

▶ MORE DETAILS 

**Trendy Connector**

With the Trendy connector you can connect two Trendy Marola or Prego fascia rolls to each other and thus get a 60 cm long fascia roll for an even more diverse choice between exercises while standing, lying or sitting.

To do this, you have to unscrew a cover from the roll and screw in the connector between the two rolls.

Incl. sales packaging.

Article 9122

▶ MORE DETAILS 

**Trendy Prego**

30 x Ø 13 cm  
Material: EVA, ABS (tube and cap)

The pyramid-shaped massage points of the Trendy Prego are especially suitable for deeper lying and more firmly seated tension in the muscle areas of the lower extremities, the back and to stabilize the trunk. The gently curved center relieves the spine and at the same time provides an intensive massage of all adjacent muscle areas. Accessories such as Trendy Bola can be stored inside the roll and closed with the screw cap.

Article 9104

▶ MORE DETAILS YouTube

**Massage Roll Pontia**

39 x Ø 7 cm  
Material: EVA, PP (cap), POM (tube), TPR (grip)

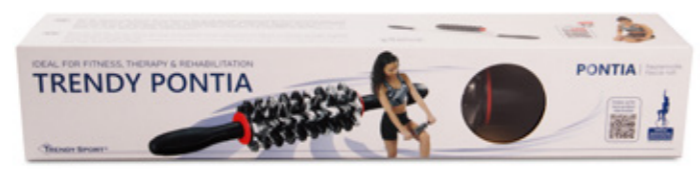

When using the Trendy Pontia you have an active and quick regeneration of the tissue. The soft tissue components of our connective tissue are known as fascia, which span our body like a net. The fascia are also involved in important movements and metabolic processes. Due to the pyramid-shaped elevations, lower-lying fascia can also be

reached and thus resolved as a result of regular use, which in turn promotes and increases blood circulation. Thanks to the handles, the roller is stable and secure in your hands and thus also makes it easier to reach places such as the neck, legs, arms and shoulders.

The roller cover a wide range of applications and, thanks to their comfortable size, fits in any sports bag.

Incl. sales packaging.

Article 9106

▶ MORE DETAILS

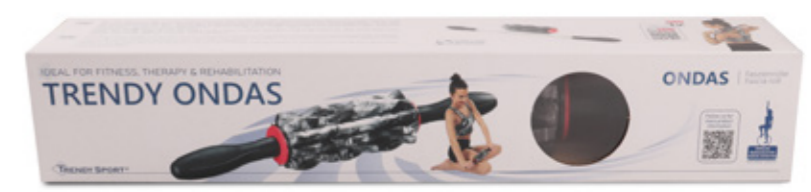

**Massage Roll Ondas**

39 x Ø 7 cm  
Material: EVA, PP (cap), POM (tube), TPR (grip)

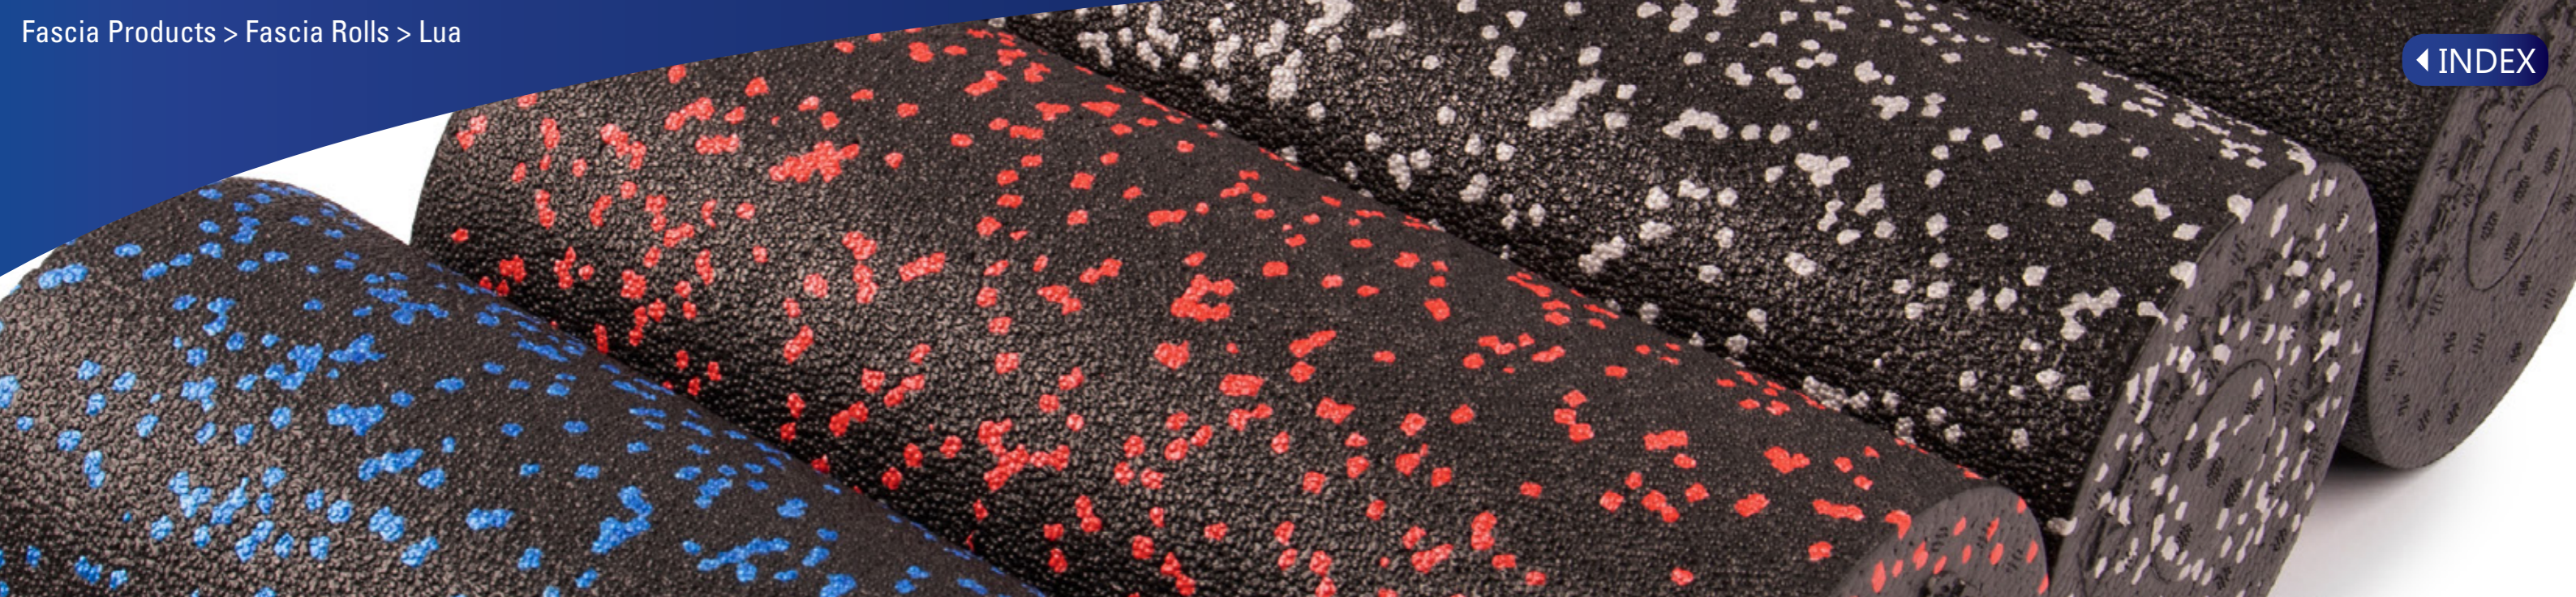

The wave-shaped massage roller Ondas does not work as deeply into the muscles as the Pontia massage roller and acts a little more gently.

Incl. sales packaging.

▶ MORE DETAILS 

### Fascia Ball Bola

Sizes: Ø 6 cm / Ø 8 cm / Ø 10 cm  
 Weight: 7 g / 13 g / 31 g  
 Material: EPP

The fascia ball series was mainly developed for the self-treatment of trigger points and tension. With the help of the compact size even small, deeper and therefore difficult to reach tensions in fascia and muscles can be achieved. This means that trigger point therapy can be used, which is especially important today. Our body is exposed to a lot of stress every day, which is mainly due to an often unfavorable work posture, too

little exercise or too much stress. As a result unilateral stress can occur in muscle and fascia tissue causing the cells to begin storing more fibers. The consequences should not be underestimated as the tissues become denser and harder which reduces blood flow. This allows shortened and compressed muscle areas to form within a muscle, the so-called trigger points. These can spread to other parts of the

body and cause severe pain there. With the help of constant pressure and regular use of the fascia balls at these points, the tissue can be relaxed and the trigger points released. Choose the right size for your fascia ball and determine the intensity of your massage yourself!

### Fascia Ball Bola Colour

Sizes: Ø 6 cm / Ø 8 cm / Ø 10 cm  
 Material: EPP

Now the fascia ball is also available in gray, blue and red in all three sizes.

The product can be customized with doming or laser engraving upon request.

**ATS® Curl Barbell**

120 x Ø 5 cm  
Material: Steel

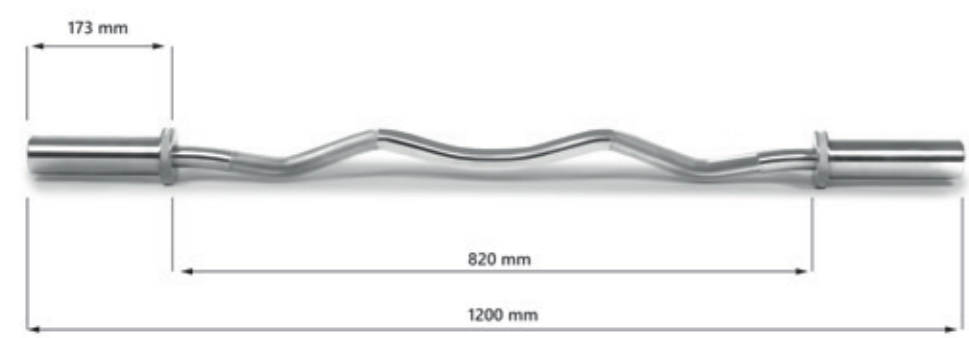

We offer a large selection of training bars to match our ATS® Polyurethan Disks and our Premium Bumper Plates. We offer this high-quality curl barbell with a handy total length of 120 cm and a sleeve diameter of 5 cm. The curl bar is particularly suitable for efficient training of the biceps, triceps and shoulder muscles and, thanks to the corrugated grip surface, offers maximum safety and

comfort during your training. The training bar is made of robust hard chrome-plated solid steel and is characterized by high tensile and compressive strength with simultaneous elasticity. Together with the noble end caps and rubber rings in ATS® design, you will be amazed by the design, function and quality!

**ATS® Training Barbell 220 cm**

220 x Ø 5 cm  
Material: Steel

Our 220 cm long Olympic competition bar corresponds to international basic dimensions and fits all weight plates with a shaft diameter of 5 cm for our Premium ATS® polyurethane plates.

With a maximum load capacity of 225 kg and a weight of 20 kg, it is suitable for both amateur and professional use, whether for powerlifting, weightlifting or bodybuilding. The integrated brass bushing ensures smooth concentricity and, together with the corrugated knurling of 44 cm, offers comfortable handling.

▶ MORE DETAILS

**ATS® Training Barbell 180 cm**

180 x Ø 5 cm  
Material: Steel

With a total length of 180 cm, this high-quality multifunctional barbell offers a space-saving solution compared to our 220 cm Olympic barbells. The product convinces with a 39 cm knurled grip surface and the high-quality brass bushing, which ensures optimal concentricity in comfort and quality. The 180 cm bar with its own weight of 13,5 kg can also be loaded with 225 kg and is ideally suited for amateur as well as professional weight lifting.

Our Barbells are made of high-quality solid steel with a timeless hard chrome coating and a cool black anodized coating and are therefore optimally protected against wear and corrosion as well as extremely tensile and pressure-resistant and yet very elastic. Together with the noble end caps and rubber rings in ATS® design, you set new design and quality standards in your home studio or professional fitness studio!

### ATS® Premium Barbell 220 cm

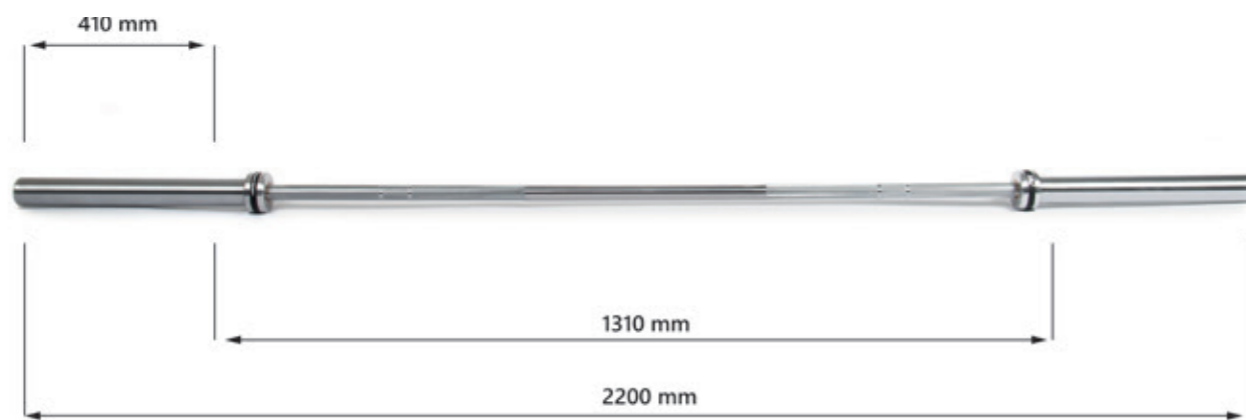

220 x Ø 5 cm  
Material: Steel

Our 220 cm long Olympic competition barbell corresponds to international basic dimensions and fits all weight plates with a weight plate holder of 5 cm diameter, e.g. for our Premium ATS® polyurethane plates.

With a maximum weight capacity of 680 kg and a weight of 20 kg, it is particularly suitable for professional weight training - whether powerlifting, weightlifting or bodybuilding. The integrated brass bushing ensures smooth concentricity and, together with the corrugated knurling of 44 cm, offers comfortable handling.

Our premium Olympic bars are made of high-quality solid steel with a timeless hard chrome coating and a cool black anodized

coating and are therefore optimally protected against wear and corrosion as well as extremely tensile and pressure-resistant and yet very elastic. Together with the elegant end caps and rubber rings in ATS design, you set new design and quality standards in your fitness studio!

**ATS® Premium Polyurethan Disk**

Inside diameter: Ø 5 cm  
Material: Cast iron, PU

Our new Aperto Trendy Sport® polyurethane disks impress with their unique design - with the black matt surface, which is interrupted by grey sporty lines, they not only set new optical standards in weight training and fit on any barbell with a 5 cm diameter.

Thanks to the PU coating, the disks are extremely abrasion and scratch resistant and therefore very durable. The four integrated anti-slip handles ensure ergonomic handling. The ATS® disks are available in seven different weight levels from 1,25 Kg to 25 Kg.

**ATS® Premium Bumper Plates**

Inside diameter: Ø 5 cm  
 Outside diameter: Ø 45 cm  
 Material: 100% Rubber

Our new Aperto Trendy Sport® Premium Bumper Plates in exclusive Trendy Sport Design offer you an even larger selection of high-quality equipment for your strength training! The weight plates consist of 100% recycled rubber granulate and are therefore not only sustainable, but also extremely durable and robust. The material makes the impact extremely quiet and gentle on the floor. Nevertheless, ATS® Rubber Disks are flexible and at the same time extremely abrasion and scratch resistant.

-   
antislip
-   
extremely good absorption
-   
very good acoustic insulation
-

**Premium Esfera Ball**

Ø 19 / 23 / 29 cm  
Material: Rubber

With the help of the Esfera Medicine Ball, you have a wide range of possible uses. The Esfera Medicine Ball is equipped with a needle valve, which ensures that you can regulate the air yourself. This enables an individual adjustment of the jumping power.

Due to its pimpled surface structure, it is particularly easy to grip, very hard-wearing and extremely durable. It is easy to wash off, which ensures a high level of hygiene. The different colours indicate different weight levels.

**Trendy Esfera Bag**

Length 55 cm / Ø 24 cm  
Material: PVC  
Filling: Sand

The Esfera weight bag appeals to many muscle groups and can therefore be used in a variety of ways. The many handles and loops enable numerous training units. With the help of the self-selectable weight levels, an intensive training can be individually adapted to your own physical performance. The special thing about the Trendy Esfera Bags is that the sandbags they contain are not

with 5 handles

sewn, but glued, which makes them burst-proof. The sandbags can be easily exchanged via a zip opening. The different colours indicate different weight levels.

### Rubber Flooring Segura Interlocking

100 x 100 cm | 1 m<sup>2</sup>  
Density: 1000 kg/m<sup>3</sup>  
Material: 100% recycled rubber

With our Rubber Flooring Segura system, we offer you high-quality floor mats in five different thicknesses for your fitness and weight areas and thus maximum safety during training, effective noise reduction and optimal protection of your floor.

With a density of 1000 kg/m<sup>3</sup>, our mats are extremely hard-wearing and are particularly suitable for equipping professional fitness and weight training areas. Thanks to the tooth system, the mats can easily be laid loosely and do not slip due to their high weight and surface adhesion.

<b>Delivery time</b>	<b>in stock</b>	<b>in stock</b>	3 weeks
<b>Min. quantity</b>	<b>1 pcs.</b>	<b>1 pcs.</b>	50 pcs.

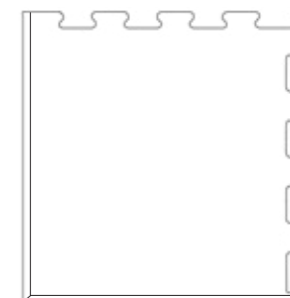

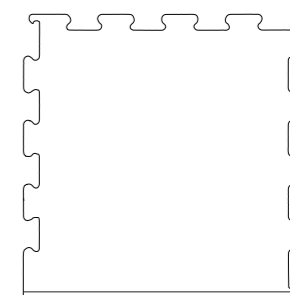

The 100 x 100 cm mats can be individually adapted to your room conditions and with their high abrasion resistance they are the perfect choice for use in fitness studios, playgrounds, kindergartens and much more. Tripping edges

are avoided by the bevelled edge and corner strips and therefore offer additional safety and comfort. Create the right foundation for your fitness area now, because the premium material is tailored to the needs of your customers

### Segura Interlocking Border & Corner

100 x 100 cm | 1 m<sup>2</sup>

We offer suitable end mats with a bevelled edge for the edging and corner edging. In addition to an elegant look, this also offers an additional safety aspect.

### Rubber Flooring Segura Absorption

100 x 100 x 2/3 cm  
Density: 1000 kg/m<sup>3</sup>  
Material: 100% recycled rubber

The new Segura Absorption rubber floor mats offer even better sound and step insulation thanks to their curved structure on the underside and are therefore not only suitable for the heavy weight area, but also for many other areas such as Outdoor, horse stables, garages, etc.

Article	22020A	22025A	22030A	22040A
Thickness	2 cm	2,5 cm	3 cm	4 cm

Due to its heavy weight, the floor lies very flat. The mats can be firmly connected to each other using connector parts, making them even more non-slip.

The mats are available in thicknesses of 2 cm and 3 cm. Available for delivery in 2-3 weeks with a minimum order quantity of 50 pieces.

▶ MORE DETAILS 

**Rubber Flooring Fundamento**

100 x 200 x 0,4 cm  
 Weight: 8,2 Kg  
 Material: 100% recycled rubber

With a thickness of 4 mm, the rubber floor Fundamento is the perfect floor covering for various cardio devices such as indoor bikes, cross trainers, steppers and much more. It offers excellent floor protection and is also extremely non-slip. Shock and sound absorbing properties ensure a comfortable and joint-gentle workout.

With the handy dimensions of 100 x 200 cm, the floor fits under any standard cardio machine. If necessary, several mats can be placed directly next to each other, so that the floor can be expanded as desired.

**StudioLine Classico**

100 x 100 x 1,4 cm (± 0,5 mm)  
 Hardness 60° – 65°  
 Material: EVA

The point-elastic and joint-friendly StudioLine Classico flooring is extremely resistant even under heavy use and is therefore perfectly suitable for fitness studios, therapy rooms and in the aerobic area. The floor covering reduces the development of noise and therefore creates a pleasant acoustic feeling of space.

Laying even without instructions is extremely easy and can be done directly on any substrate without costly preparation. The antibacterial floor is also easy to clean with water. StudioLine Classico offers a color selection between four different colors and thus offers interesting combination options to individually upgrade your fitness area!

Colour differences possible, height differences of 0,5 mm possible.

▶ MORE DETAILS

**StudioLine Madeira**

100 x 100 x 1,4 cm (± 0,5 mm)  
 Hardness 60° – 65°  
 Material: EVA

StudioLine Madeira is the resistant floor covering for high demands in fitness studios and therapy rooms. The point-elastic and joint-friendly StudioLine Madeira floor remains dimensionally stable even under heavy use and is ideal for aerobics and therapy.

It is extremely easy to lay without instructions and can be carried out directly on any surface without costly preparation. StudioLine Madeira enhances every fitness area with its elegant wood look!

Colour differences possible, height differences of 0,5 mm possible.
